The Firm was published in 1991, and almost overnight John Grisham became a household name and a force to be reckoned with in the realm of fiction. There must be something in the water down in Oxford, Mississippi; while Grisham is certainly no Faulkner, he is a man who knows how to make a novel come alive and ensnare any reader who comes along. I really do not care for lawyer-type novels as a general rule, and the fact that Grisham makes such stories so gripping and fascinating has me quite in awe of his talents. Mitch McDeere (whom many may still envision as Tom Cruise, since he played in the role in the movie based on this novel) is a highly intelligent yet monetarily challenged law student finishing up his degree with high honors at Harvard. Holding serious offers from prestigious Chicago and Wall Street law firms for his services, he decides to go ahead and hear the pitch from a smaller law firm in Memphis. What he hears is an offer he cannot believe and cannot refuse. A starting salary significantly higher than he would make elsewhere, promises of

large bonuses for passing the bar exam and succeeding on the job, an ascension to partner in as short a time as a decade, a new house with a miniscule mortgage rate, a brand new BMW, and other perks soon have Mitch and his wife Abby settling down in Memphis to enjoy a life of luxury (albeit with hard work on his part). The firm really seems to care about Mitch and his family, wanting happy marriages with several children, to a degree that has Abby a little suspicious. Mitch passes the bar exam, and life is great, despite the fact he is working eighty hours or more a week. Then an FBI agent comes to see him, dropping hints of nefarious dealings at the law firm, asking him for help.
